

Join us for a webinar discussing:  
**Rationally Invasive Endodontics With  
New Heat-Treated Rotary Instruments**

**Speaker: Professor Gianluca Gambarini, MD, DDS**

**Category: Endodontics**

**Date: Oct 27 at 9:00AM EST (LIVE)**

University of Rome,  
La Sapienza, Dental School;  
Director of Master of  
Endodontics in Sapienza

**Description:**

Understanding anatomical complexities and their clinical challenges is critical to achieving positive clinical outcomes in endodontic cases. Join Dr. Gianluca Gambarini, internationally renowned lecturer, professor of endodontics, and practicing endodontist, for a review of strategies to understand and plan anatomically complex cases. He will discuss the correlation between anatomy and stress during instrumentation, the ideal properties of NiTi files and will provide a review of a new, innovative martensitic endodontic instrument **EDGEFILE® X7**. Dr. Gambarini will focus on rationally invasive endodontics, including:

- Concepts and strategies
- Clinical use of instruments
- Simplified sequence
- Why bioceramic obturation
